Recognition Versus Self Determination Dilemmas
Decisions are the heart of success and at times there are critical moments when they can be difficult, perplexing and nerve racking. This side provides useful and practical guidance for making efficient and effective decisions in both public and private life.

Overcoming Serious Indecisiveness
In developmental psychology and moral, political, and bioethical philosophy, autonomy is the capacity to make an informed, uncoerced decision. Autonomous organizations or institutions are independent or self-governing. Autonomy can also be defined from a human resources perspective, where it denotes a (relatively high) level of discretion granted to an employee in his or her work.

vagueness. The characteristic of words or phrases whose meaning is not determined with precision. Use of one or more vague terms typically renders it impossible to establish the truth or falsity of the sentences in which they appear. Example: "The temperature is warm today." is difficult to evaluate because there is no clear borderline between "warm" and "not warm".
